

This is a great fun fold that can be used for any occasion – not just Christmas or Thanksgiving! The card starts vertical, but as you open it, it swivels to the horizontal while the front piece stays upright in either position!

It does require precision with the cuts and the folds to work properly but the video (see below for the link) gives you great tips for how to do that more easily. The ribbon is optional but does help the card stay closed and adds a fun element to the experience of opening the card.

Happy inking!

Love
Bridget A

And at drunkdogcreative.com

CUT PLAN

Metric (A6 card – Australia/UK) – all measurements are in mm.

- Card Base (cut 2): 105 x 277 scored at 148
- DSP 1: 100 x 100 cut in half diagonally from top left to bottom right
- DSP 2 (cut 2): 100 x 18
- Writing Panel: 95 x 138
 - Optional: Double layered writing panel – 100 x 143 DSP for mat, and 90 x 133 for white writing panel

Optional:

- Ribbon: 450
- Scrap for front sentiment.
- Ephemera for front (optional)

Imperial (A2 Card – USA) – all measurements are in inches.

- Card Base (cut 2): $10\frac{3}{8}$ x 4.25 scored at 5.5
- DSP 1: 4.25 x 4.25 then cut diagonally in half from top left to bottom right
- DSP 2 (cut 2): 0.5 x 4
- Writing Panel: 3.75 x 5
 - Optional: Double layered writing panel – 4 x 5.25 DSP for mat, and 3.5 x 4.75 for white writing panel

Optional:

- Ribbon: 16
- Scrap for front sentiment.
- Ephemera for front (optional)

INSTRUCTIONS – see video tutorial at <https://youtu.be/oyLdrr-p7jo>

Imperial measures are in parenthesis. Please remember there is no correlation between the metric and imperial. They are not a conversion. The finished Imperial card is a different size to the finished Metric card.

- Cut and score all cardstock as per cut plan.
- With a bone folder, crease the score lines on the two card bases.
- With the right card base open and facing up, with the 148 mm (5.5”) section on the left side, mark at 22mm (5/8”) to the right of the fold on the top front. Score on the diagonal from the mark to lower right front corner. Before creasing with bone folder, ensure the fold lines up along the bottom edge exactly when the vertical fold. Adjust fold if needed. Press with bone folder. **Hint: Use a straight ruler to make the 22mm mark. Using the ruler on your paper trimmer or scoring board can lead to inaccuracies.**
- With the left card base open and facing up, with the 148 mm (5.5”) section on the right side, mark at 22mm (5/8”) to the left of the fold on the bottom front. Score on the diagonal from the mark to upper left corner. Before creasing with bone folder, ensure the fold lines up along

the bottom edge exactly when the vertical fold . Adjust fold if needed. Press with bone folder.

- Align the two card base pieces so that the 148 x 105 (4.25 x 5.5") section of each match up.
- With the left piece horizontal, place glue all over the 148 x 105 (4.25 x 5.5") section
- Lay ribbon across the middle of the glue section from top to bottom.
- Align the right card base over the left card base that so that both 148 x 105 (4.25 x 5.5") sections match and affix right to left being very careful that they align exactly. The ribbon will now be sandwiched between the two card base pieces. Once the glue dries, you will have one combined card base.

Hint: alignment is very important. I highly recommend using glue instead of score tape or glue tape. Wet glue allows you to move the pieces somewhat until you have the correct alignment. Glue tape and score tape do not allow for that.

- Affix the two DSP 1 pieces to the outer triangles of the card base.
- Fold the flaps (which will rotate the card to the vertical).
- Affix the two DSP 2 pieces to the top and bottom of the card front.
- Create a sentiment tag or ephemera for the front of the card. Affix to the middle but ONLY use adhesive on the top right half so it is only stuck to the top right panel (otherwise your card will not open!).

Step It Up Options:

- Use a contrasting DSP for the inside triangle areas of the Card Base that are currently blank.
- Stamp images on the two triangle areas of the card base that do not have DSP covering them.

Hint: Stamping an image in the same ink colour as the paper is often an effective way of adding interest without competing with or clashing with the DSP patterns.

- Add ephemera or embellishments if desired.
- Add a sentiment to the inside writing panel.
